PROFESSIONAL SUMMARY

Data Analyst with two years of experience preparing and analyzing structured data using Python, pandas, Excel, and SQL. Cleaned 20,000+ billing records and co-built fee-prediction models that explained 75% of fee variation, while managing reporting, QA, and stakeholder projects across 70+ university websites and 400+ sites. Skilled in dashboards, data validation, and communicating actionable findings.

EXPERIENCE

University of Arizona Information Technology Services **May 2024 - Jul 2026**
Web Analyst *Tucson, AZ*

- Directed 25 site redesigns and Pantheon cloud migrations, **delivering sites that serve 10,000+ daily visitors** while coordinating scope and deadlines via Jira and Excel.
- Cut QA time per site from about an hour to 15 minutes by **standardizing testing across 400+ sites**, saving the team about 20 hours a month and fixing 100+ issues.
- Built, updated, and **maintained 70+ Arizona.edu websites on Drupal and WordPress**, using Google Analytics to monitor traffic and improve overall site performance by 15%.
- Resolved website support requests from faculty and staff and cut new faculty site setup time by 25% by simplifying onboarding with academic departments.

Weiss Brown x University of Arizona **Jan 2026 - May 2026**
Data Analyst (Capstone Practicum) *Phoenix, AZ*

- Developed a **regression model that explained 75% of fee variation** (R-squared = 0.75), showing partners which deal factors drive legal fees most and giving them a data-backed basis for quoting new deals.
- **Cleaned, transformed, and validated 20,000+ billing records** spanning five years into an analysis-ready dataset using Python pandas and Excel, supporting accurate downstream modeling.
- Built and compared three pricing models (linear regression, random forest, XGBoost) on a 4-person team, using 10 features that capture deal complexity.
- Co-designed **a fee-quoting tool,** documented an implementation plan, and presented pricing recommendations to firm leadership, explaining the analysis and its implications for new deals.

PROJECTS

Restoring Relatives Website

- WordPress, HTML, Google Analytics
- Building the first website for a new Native American-led organization from scratch in WordPress.
- Gathered requirements from the founder and translated organizational goals into a clear WordPress site structure, page layout, and navigation.

E-commerce Funnel Analysis (Google Merchandise Store) **Oct 2026 – Present**
SQL, Google BigQuery, Google Analytics 4

- Wrote SQL in BigQuery to analyze 4.3M Google Analytics 4 events from 270K users, building a 4-step purchase funnel (product view to purchase) by device, traffic channel, and product category.
- Found that 54.5% of shoppers who started checkout did not buy and estimated that raising checkout completion to 50% would add about 440 buyers and $36K in revenue over 3 months.
- Ruled out device as the cause and found paid-ad traffic converted the lowest (4.8% vs. 8.1% for referrals).

EDUCATION

University of Arizona **Aug 2022- Jul 2026**
B.S.B.A., Management Information Systems; Minor in Public Relations

- **Coursework:** Data Structures & Algorithms, Systems Security Management, Information Security Risk Management, Database Management Systems, Information Systems Analysis and Design, Analytical Methods for Business, Business Data Communications
- Job Shadowing: United Healthcare

SKILLS

- **Languages**: Python(pandas), SQL (MySQL, BigQuery), HTML
- **Data & Analytics**: Pandas, Excel (Pivot Tables, XLOOKUP), MySQL, Database Design, Data Cleaning, Data Quality Validation, Regression Analysis, ETL
- **Web & CMS**: Drupal, WordPress, Pantheon, site migrations, web accessibility, QA testing
- **Visualization & Reporting**: Power BI, Tableau, Google Analytics, Dashboards, Report and Dashboard Creation, Audit Reporting
- **Tools & Methods**: Jira, Microsoft Office, Microsoft Visio, Agile/Scrum, Requirements Gathering, Wireshark, Figma
